### **ATTENTION!**

***This project has been stripped with a dry blasting system. Blasting residue must be removed from surfaces before applying any coating! HoldTight 102, a water additive, is highly recommended to remove surface salts and prevent flash rust. Benefits of HoldTight 102 include: no flash rust for 3 to 5 days or more; no salts or other non-visible contaminants; removes oil & grease; no detectable residue; non-toxic, biodegradable, non-flammable; approved or accepted by almost all coatings manufacturers. Application instructions will be provided with the purchase of this product.***

***Special Note: Poor wash water quality can affect results.***

***For more details contact:***

***HoldTight Solutions: 1-800-319-8802 and www.HoldTight.com***

***KBS Coatings users may use Aqua Klean & Rust Blast.***

***POR-15 users may use Marine Clean & Metal Ready.***

**CONSULT AND FOLLOW ANY AND ALL COATINGS  
MANUFACTURERS PRE-PAINT INSTRUCTIONS!**

---

### **ACKNOWLEDGEMENT**

The importance of blast residue removal has been explained to me. With the purchase of HoldTight 102, I received written instructions that I have read and understand. I affirm that I understand the procedure and the importance of carefully following the instructions. I also understand that if blast residues are not properly removed, a coating failure or related problems may result for which Chesapeake Soda Clean, Inc. will not be held responsible. In such a case I agree to hold them harmless.
